Zurich Pediatric Transplant Symposium

PTLD in Children: Current Knowledge, Clinical Aspects and Outlook

University Children's Hospital Zurich
Friday, June 19, 2026, 09:00 – 16:30 h

Post transplant lymphoproliferative disease (PTLD) remains a serious complication of immunosuppression in children. Prevention, early detection, and tailored treatment are essential for better outcomes. Our symposium features expert lectures, interactive case discussions, and networking with specialists in pediatric heart, kidney, liver, and stem cell transplantation.

We warmly invite all physicians, nurses and scientists involved in the care of transplanted children to join us in our new children's hospital. We hope this first meeting will encourage collaboration and knowledge exchange among colleagues from Switzerland, Germany, Austria, and beyond.

Local Organizing Committee:

- Prof. Dr. med. Christian Balmer, Pediatric Cardiology
- Prof. Dr. med. Tayfun Güngör,
Pediatric Stem Cell Transplantation and Cellular Therapies
- Dr. med. Dr. phil. nat. Mathias Hauri-Hohl,
Pediatric Stem Cell Transplantation and Cellular Therapies
- Dr. med. Wesley Hayes, Pediatric Nephrology
- KD Dr. med. Sabine Kroiss Benninger, Pediatric Oncology
