

# 8<sup>th</sup> Pediatric Infectious Disease Training Course

Geneva University Hospitals, October 29-30, 2026

# 8<sup>th</sup> PIGS Training Course

**October 29-30, 2026, Geneva University Hospitals**

The local organizing committee is pleased to announce the next PIGS training course. This two-day course highlights essential topics in pediatric infectious diseases. State-of-the-art lectures will update participants on the diagnosis and treatment of important infectious diseases. Topics will cover the broad field of pediatric infectious diseases. Finally, interactive case presentations will allow for vivid discussions.

## **Selected topics (detailed program will be available in May 2026):**

- Management of Multidrug-Resistant (MDR) Infections in Outpatient Practice
- Fever in the Returning Traveler: A Practical Clinical Approach
- Interactive Case Discussions with an Expert Panel
- RSV in 2026: Where Do We Stand?
- Common Infectious Dermatologic Conditions in Pediatric Practice
- Laboratory FAQs in Pediatric Infectious Diseases: Practical Interpretation for Clinicians
- Lyme Disease: Current Challenges in Diagnosis and Management
- Emerging Infections at Our Doorstep: Focus on Dengue Fever

The course is addressed to all physicians interested in pediatric infectious diseases

**Time** : Thursday 29 October, 9.30 PM – Friday 30 October, 2PM

**Venue** : Geneva University Hospitals

**Language** : English
